

Meat Packaging & Food Preparation Yieldmaster® High Temperature Cook-In Bags

Description

M&Q Packaging Corporation is the leader in the development and production of Yieldmaster® High Temperature Cook-In Bags for the meat packaging and food preparation industries.

Meat packers, institutional food processors and retail customers count on M&Q Packaging Corporation to deliver the highest quality cook-in bags in the most cost-effective and efficient way.

Our Yieldmaster® High Temperature Cook-In Bags are an excellent choice for use with turkeys, chickens, ribbed meat, spiral-sliced hams, whole-muscle red meats and vegetables.

Our bags not only improve the yield, flavor and appearance of meat and vegetables, but also allow the food product to cook and brown properly, without adhering to the bag.

Meats or vegetables that are hermetically sealed in our Yieldmaster® High Temperature Cook-In Bags avoid cross-contamination, as the product travels through the distribution chain from processor, to the grocer and into the consumer's oven. Our bags also maintain the integrity of the processor's original recipe.

M&Q Packaging Corporation is the manufacturer of a shrink polyester cook-in bag offering shorter lead times, flexible order quantities and more cost-efficient storage alternatives.

Features/Benefits

- *Is an excellent choice for use with meats and vegetables*
- *Provides a reliable, strong and safe solution for cooking and reheating in conventional ovens at temperatures up to 400°*
- *Reduces cooking time by 33-50%, preventing overcooking*
- *Allows for a more desirable browning process than competitors' bags and can easily be monitored through the transparent bag*
- *Keeps meat protein from adhering to the bag*
- *Increases the yield and value of the product, keeping it moist, while preserving the color, juice, taste, flavor and nutritional content*
- *Prevents handling of raw meat and eliminates cross-contamination*
- *Decreases the amount of time spent on cleaning cookware*
- *Is ISO-registered, NSF-certified, Kosher, HALAL-approved and in compliance with FDA regulations*
- *Can be tailored to meet specific shrink property requirements*

Applications

Is available in a variety of sizes and bag styles:

- Flat-bottom
- Round-bottom
- Clipped
- Star-sealed

Our most popular bag is the round-bottom version

Custom, engineered solutions are also available from M&Q Packaging Corporation. If you choose M&Q Packaging Corporation's polyester cook-in bag solution, we can tailor the shrink characteristic to meet your needs.

The M&Q Advantage

Founded in 1956, M&Q Packaging Corporation not only has the ability to process different types of plastics, but also delivers precisely engineered solutions to various plastic applications. Our quick turnaround time, exceptional customer service, and superior value for the investment make M&Q the choice for custom-designed plastic packaging products.

M&Q Packaging Corporation is the number-one choice in many high-profile industries for the design, manufacture, and production of packaging solutions with standard and custom nylon, polyamide, polyester and polyethylene films. As a custom-manufacturer, we work closely with our customers in order to provide a finished product and solution that exceeds all specifications and regulations. We purchase only the highest-quality raw materials from our suppliers. Our Quality Assurance Team inspects each and every packaging product before it leaves our facility, guaranteeing that our customers receive only the best product from M&Q Packaging Corporation.
